FOOTBALL OUTLOOK GOOD.

The football season of 1909 was opened when Manager Johnson issued a call for candidates for the team just before the opening of college. As regards the number of men turning out the situation at the beginning of the season is satisfac-

up well in the work so far, and there seems to be considerable heavy, fast material in this class. In spite of the extreme heat of the past week

COACH GEORGE H. SCHILDMILLER

tory although there is a lack of heavy, fast men. In all sixty-two suits were issued by the management and nearly every afternoon there have been enough men in uniform on Alumni Field to make up four elevens. Several Freshmen have shown

CAPTAIN HORACE J. COOK

hard work from the start has been the rule and the team promises to be a fast one this year. Thus far only the rudiments of the game such as

42981

handling punts and passes, falling on the ball, starting, and work on the dummy together with practice in blocking and breaking through, with some scrimmaging have been attempted. A few words in regard to the men who have the handling of the team in charge and the different members of the squad may be of interest.

George H. Schildmiller, Dartmouth, '09, was engaged last spring to coach the team this fall. He attended Princeton one year and then went to Dartmouth where he played football for three years. His work at end attracted the attention of everybody interested in football and he was picked as an All-America end for two seasons. Although he has been with the squad but little over a week he has accomplished much in that time and the squad and student body place the fullest confidence in him.

"Steve" Farrell needs no introduction to any man who has ever attended the University of Maine. To the entering class and those who do not know Mr. Farrell it may perhaps be well to state that he is in the foremost rank in his profession and stands in the same class with "Mike" Murphy and Johnny Mack. If anybody doubts "Steve's" popularity with the students it is only necessary to hear and see the reception "Steve" receives every time he can be made to speak at any of our mass meetings.

Chester C. Johnson, '10, of Portland is the manager of the team for this season. He prepared at Deering High School. Since entering college he has been prominent in both debating and athletic lines. Besides being the manager of the football team Mr. Johnson is president of the Athletic Association.

Horace J. Cook, '10, captain and end, prepared for college at Waterville High. He has played 'varsity football for three years and in his sophomore year was captain of his class team. He has also been a member of the track team for three years. He is as popular and well known a man as there is in college.

The graduation of the class of 1909 left several holes in the team which will have to be filled this year by new men. Three members of last year's team have graduated. They are Captain White, Ham and Black. Captain White played tackle

for the greater part of last year but finished the season at left guard. Ham played right guard and Black centre.

Several members of last year's team have either left college or are unable to play at present. Cobb, who alternated with Hammond at fullback last year has left college, and "Allie" Cook is not yet out.

Altogether there are eight old men who made their M last year about which to build the team this year. They are Ray, '10, left tackle; Captain Cook, '10; Gardner, '10, end; Bearce, '11, right tackle; King, '11, right end; Hammond, '11, fullback; Duran, '11, guard; and Parker, '12, who played right halfback last season. For Ray and Cook this is the fourth season. Nearly all the 1911 men made the team in their freshman year, while Parker's work at halfback last year is remembered by all the upperclassmen.

In addition to the regulars left there are several of last season's first string subs back. Conlogue, '10, is out for tackle again this year and with the experience he has gained should prove a valuable man. Pratt, '10, is a speedy halfback and played in all the state games last fall. Wright, '10, is again out for guard. Buck, '11, is making a strong bid for an end position and Derby '11, one of Black's understudies for the centre position last season, is putting up a good game at centre. Hilton is a candidate for a guard position, and is as heavy and strong as ever. Smiley, '12, is at present playing the position at halfback left vacant by the absence of McHale. Batty, Haskell, and Woodard are all on the squad again this year.

Several members of the freshman class have shown up well so far. Eales is fighting it out with Derby for center, and Sawyer is a likely candidate for one of the guard positions. Ryder and Davis are strong, fast men and will make some of the old men in the backfield positions work hard to hold their places. Some new men from the upper classes are also out for the first time. Hosmer, '11, is playing a good game at halfback and Crosby '12, is out for guard.

While it is of course too early in the season to make any estimate of the strength of the team it is evident that it will be full of the proper kind

of fight and determination and that the coach will be able to get the utmost out of each man on the team. The schedule for the season follows:

Sept. 25th. Massachusetts Agricultural College at Orono.
Oct. 2nd. Maine Second at Orono.
Oct. 9th. New Hampshire State College at Orono.
Oct. 16th. Harvard at Cambridge.
Oct. 23rd. Tufts College at Medford.
Oct. 30th. Bates at Orono.
Nov. 6th. Colby at Orono.
Nov. 13th. Bowdoin at Brunswick.

THE CONTROVERSY OVER HAZING.

Early in the summer the University authorities sent out a letter to each member of the three upper classes informing him that action had been taken to require a promise to refrain from hazing before a student should be allowed to register this fall. This did not deter anyone from returning to the campus but when the students had assembled and talked the matter over the feeling spread that under the present construction of the pledge it might be understood to mean every possible, and perhaps perfectly harmless kind of hazing and that class distinction could not be preserved at all if this were the case.

Consequently a committee of students consisting of Kent R. Fox, Vinton Ray, M. E. Fassett, and Harvey Jordan of the senior class, George A. Wakefield of the juniors, and S. A. Joyce of the sophomores, conferred with President Fellows and six of the trustees and requested to have some sort of definition applied to the term.

As a result the trustees expressed their wish that harmful forms of hazing, specifically the night "razoo" and the practice of throwing in the river, be abolished. The committee heartily concurred in this desire of the trustees and in reporting to the students at a subsequent mass-meeting advised them to sign the pledge.

After a delay of one day in registration all the students put their signature on the pledge-cards and handed them in with their other registration papers. It was believed that the matter was settled and that both parties were satisfied, the authorities thinking that the two most undesirable practices would be done away with and the students believing that the freshmen could be

disciplined in other ways.

Immediately following the posting of the sophomore proclamations, however, President Fellows called the sophomore class together and told them that they must cease every form of hazing whatsoever. His interpretation of the agreement aroused instant indignation among the students and each of the upper classes have voted to support the sophomores provided they have no "razoo." The sophomores have not taken any steps since President Fellows' speech to make the freshmen feel their position and so the matter is now hanging fire. Both sides to the controversy have made their stand clear, the faculty that there must be no hazing, the students that their pledge only covers razoos and duckings.

NEW FACULTY RESIDENCES.

During the summer three tasty residences were added to faculty row at the north end. Each of the houses is a square-framed, two-story building but their exteriors are finished differently. Within, however, the rooms are arranged similarly with four on each floor. The houses are equipped with all modern conveniences and are in every way ideal homes for members of the faculty.

The southernmost one will be occupied when finished by Prof. McKee, the next one by Prof. Gray, while the third has not been taken as yet.

FALL TRACK WORK.

Among other interest of the fall is the annual track meet between the two lower classes. The track has been weeded out and rolled and already several sophomores have begun work. Among their number are: Tartre in the 100 yard dash, Josselyn in the 2-mile; Houghton in the 1-mile; and Joyce in the weights; all of whom are strong men. Karl Woodward of Kingston, Mass., has been elected manager of the 1912 track team and William Murphy of Portland that of the 1913 team.

The Marathon run from Oldtown to the campus which was such a success last year, will be tried again this fall. This will be open to all four classes.

EDITORIAL.

WITH what a feeling of pleasure do we return to dear old Maine and walk across her beautiful campus, clasping hands with fellow after fellow, and seeing everyone else doing the same. Indeed, it is a great privilege to be a Maine man and one of the crowd of Maine fellows.

Think of the growth of our University from an insignificant school only four decades ago to the institution of its present comprehensiveness. Imagine what it may be four decades hence. This institution has risen with a rapidity only

paralleled by that of the growth of Western universities. Let everything tend to make this year constitute its part toward the advancement of the University.

JUST at present the branch of athletics that is holding the attention of the college world is football. Every college and university has its men at work and Maine is in line with a fine squad of forty men including at least six veterans of last season and a good force of new material, with a coach who comes here with an excellent reputation and has already won the favor of the players and onlookers, and with a captain who truly deserves his position and holds the confidence of all.

Now, students do not like to be members of a college which is continually losing more than it is winning, as it must be admitted Maine has done in the past few years. They want their colors to be victorious and any college man with the smallest semblance of spirit, who only backs his teams half-heartedly when they lose, will grasp eagerly at the least chance for having a winning team. Maine men can not be accused of ever having supported their teams half-heartedly—they have only cursed Maine's luck. Here, however, is the opportunity for which they have been looking.

The game last Saturday was very satisfactory from a Maine standpoint and the outlook is bright. Maine men must root for the football team for all they are worth and let that remembrance of past defeats be displaced by a continually increasing confidence in the successful outcome of this season. They must support that eleven body and soul—and purse.

Seven thousand dollars is the largest sum ever spent at Maine on athletics, yet, granting that there are 700 students enrolled, if each man subscribes ten dollars the amount will be provided and all that is raised from the alumni and from

gate receipts can be used to advantage for other expenses.

How can a Maine man feel who knows, when he sees, her teams go onto the field, that if every fellow were like him Maine would have no teams!

IT is to be regretted that the matter of hazing should cause such a rupture between the faculty and the student body of the University. The best interests of the institution are at stake. No college or school can progress without the co-operation of students and teachers.

At the request of the trustees the students have signed the anti-hazing pledge with the understanding that it is intended to abolish all harmful hazing, particularly the night "razoo" and the practice of throwing unruly freshmen in the river. The former method of hazing is commonly admitted by the students themselves to be dangerous, although the latter is not necessarily so. While the student body believes that, in pledging itself to refrain from the razoo, it is abandoning the most effectual means of making the Freshmen realize their position, it feels that the practice is unjust to the first year men and that it is carrying hazing too far. Consequently the students have placed themselves on their honor not to "razoo" or immerse the Freshmen, and they will keep their word.

But there ought to be and there is bound to be hazing in the University. It was only with the understanding that the pledges only related to two forms of hazing that the students voted to sign them. Maine is a small institution, and situated in a small town instead of a city, which two facts are two very good reasons, as proven by the life in many similar colleges, for the generation of numerous and ironbound customs. Another reason of high importance is that only about half of the Freshman class are taken into fraternities.

In the society houses the Freshmen receive their discipline and at some colleges, as Bowdoin, practically every man in the entering class shares it. Here, however, fifty per cent of the Freshmen, and these are usually the worst ones, do not have such discipline. Class distinction must be maintained and how are these men to realize that unless they are hazed?

Again, conditions at Maine are far from being ideal for arousing the most intense college spirit but the bad effects of these conditions may be lessened by allowing hazing to continue. Every time the Freshmen are called out and every time they take part in a scrap they are more closely united and their class spirit becomes stronger. And in class spirit originates all the college spirit that a fellow ever possesses.

REGISTRATION.

Although registration was supposed to close Friday, the usual number of new men have been coming in late. Now, however, registration has practically ceased, and the records show that 195 new students have entered the University this fall. Of this number 140 are regular freshmen, 14 are taking the short pharmacy course, 12 are registered for the school course in agriculture, and 19 are entered as special students. Of the new special students, one will take the teachers' course in agriculture, four have entered the junior class, and five in the sophomore class. Of these new men 151 are from Maine, 31 from Massachusetts, 2 from New Hampshire, 2 from Rhode Island, 1 from New York, 1 from Connecticut, 1 from Pennsylvania, and 4 from the other states. The complete list is as follows:

A \$60,000 DORMITORY IN 1910.

Ground will soon be broken for one of the best equipped dormitories in any of the Maine Colleges. It will be a four-story building of brick and stone and will be located north of Oak Hall and near the entrance to Alumni Field. The architecture will be that of the Tudor period and the plans are by William H. Taylor of Boston, who designed the new Agricultural Hall. These call for an expenditure of \$60,000 which will be taken from the general appropriation made by the last legislature of \$100,000 annually for four years.

The basement will be given up almost entirely to a dining-hall, which will have a seating capacity of 300. The kitchen will be in an ell at the rear. Oak Hall and the new dormitory will be connected by a corridor opening into the dining-room.

Nearly 90 students will be accommodated, a number of three-room suites being provided and every room being very desirable. The first floor will have in addition to eight studies with sleeping accommodations adjoining, an apartment for the professor in charge and rooms for the University Y. M. C. A. The second and third

floors will be devoted entirely to studies and bed-rooms.

A feature of the building will be the fireproof walls which will divide it into three parts, each part having its own entrance. Although corridors will connect the sections, provision will be made to close them immediately in case of necessity.

The contract for the construction will be let soon and the building will be erected next year so that it will probably be open for the fall semester.

TRAINING TABLE PROPOSED.

Maurice F. McCarthy, secretary of the executive board of the Athletic Association called a committee meeting Monday, the twentieth. The committee, with two alumni, assembled in the smoking room of the library.

Several important matters were discussed. In regard to the season athletic tickets, it was voted that all law students should pay five dollars and the "co-eds" two dollars and a half.

The committee after some lengthy discussion voted to appoint a committee including an alumnus, Paul Morris, to consult the coach of the football team in regard to having a training table. A training table is a necessity which Maine lacks and which she should have in order to carry out a successful season. A report from this committee is expected soon, and in all probability a training table will be established.

MAINE 0, MASSACHUSETTS A. C., 0.

In a game which was an ideal one for showing up the weakness of both teams the Maine and Massachusetts Agricultural College elevens pushed each other up and down the field last Saturday, neither being able to score. Maine had as her opponents, not a team strong enough to smash through her line at any time of the season nor one so weak that the game was no try-out for her, but a team which was practically her equal and the contest brought out many of the faults of the Maine men.

The "Aggies" had a heavy line but Maine's was by far the firmer, and time and again they

were compelled to punt. Parker in Maine's backfield was able to make long and constant gains through the opposing line but the other backs were slow. They showed themselves fearfully weak in catching and running back punts and not one of the three quarterbacks tried out made himself much surer of a position on the team. Both elevens were penalized several times.

Bearce kicked off to the Bay State team which had the west goal. The Aggies could not gain and kicked but soon regained the ball on an attempted forward pass. They punted again and then Maine carried the ball to the Aggies' 20-yard line where it was lost on downs. M. A. C. kicked and for most of the remainder of the half the ball was in Maine's hands and in the M. A. C.'s territory. A fumble or penalty prevented Maine from scoring, however, each time that she was within striking distance of her opponent's goal.

In the second period Maine used several new men but though she carried the pigskin to the M. A. C.'s 25-yard line she could not score.

Maine's attempts at the forward pass were not successful but twice in succession in the second half Parker worked the onside kick, King catching the ball each time for gains of 30 and 20 yards.

The line-up was as follows:

MAINE.	M. A. C.
Cook, l. e.....	r. e., Leonard
Ray, l. t.....	r. t., Shermehorn
Hilton, Duran, l. g.,	r. g., Walker
Derby, Eales, c.....	c., Hayden

chorus la

out a fast nine and the first game this week promises to be interesting. The sophomores were badly beaten last year and do not intend to take a similar beating this fall.

Frank Darrell of Brooklyn, N. Y., and V. J. Clark of Guilford, are manager and captain respectively of the Sophomore team and Harold Hamlin of Orono and J. W. Carey of Auburn hold like positions with the Freshman team.

Although it has always been customary to hold the flag scrap and play the first baseball game the second Saturday of the semester, the large number of classes Saturday morning caused both the rush and the game to be postponed until this week.

FIRST CHAPEL.

At eleven o'clock Thursday the students assembled for the first chapel service of the fall semester. Pres. Fellows, assisted by Dean Hart and Dean Stevens, led the services. After the singing of the University hymn Pres. Fellows called on a few representative men to give brief talks on the college activities.

Isaac M. Stover, '08, of Orono was the first to speak. In a very forceful manner Mr. Stover outlined the work of the college Y. M. C. A. He stated that the college man had every facility for the building up of a strong mind and healthful body through the courses and athletics in the University but that it was the duty of the Y. M. C. A. to build up his spiritual side. Mr. Stover extended an invitation to all college men, particularly those entering for the first time, to be at the Y. M. C. A. reception the following Saturday.

Dr. Fellows next introduced Prof. G. W. Thompson who comes from Franklin and Marshall University, to take charge of the German department. Prof. Thompson, although a German teacher, is deeply interested in music and addressed the student body with a few words along this line. He thought that with a little time and the co-operation of the students, the college choir could be improved and music in general lifted to a higher standard in the University. He also spoke of forming a mixed chorus later in the year if he could obtain the

desired help from the students.

C. C. Johnson, manager of the football team spoke last on the familiar subject of athletics. He summed up the season's prospects and spoke of the good material and coaching which were to carry the football team on to victory. The new men had their first experience of college spirit as Mr. Johnson showed them the necessity of getting out on the field and working hard for the 'varsity squad. The literary interests were represented by Sumner Waite, editor of the 1911 *Prism*.

TEAMS FROM COLLEGE OF AGRICULTURE IN COMPETITION.

A team of three men from the College of Agriculture will try to repeat next week the victory which was won last year at the Brockton fair in the stock-judging competition. In the contest are represented all the agricultural colleges of New England the outcome last year was of much credit to the training given at Maine.

Another team will probably be sent to the New England Fruit Show at Boston Oct. 19-22.

EXTENSION WORK OF COLLEGE OF AGRICULTURE.

During the summer the College of Agriculture has carried on in a greater degree than ever before extension work throughout the state. Every county has been visited and hundreds of lectures and demonstrations have been given to instruct the farming population in the most modern methods of agriculture.

Early in the summer every member of the faculty of the college was engaged in the work under the general direction of Dean Hurd and Professor McClintock. Later, however, the number was lessened by the resignations of Professors Hurd, McClintock and Waid. Mr. E. A. Stanford of the Bureau of Plant Industry at Washington, worked in co-operation with the professors.

The subjects taken up in the lectures pertained mostly to agronomy, such as the mixing of fertilizer and orchard spraying, but instruction was given in several of the summer normal schools and considerable stock judging was done.

A BAND WORTHY OF MAINE.

The faces of Manager Charles Smith, '10, and Leader Markle, '11, of the band are wearing a happy smile for from all indications the band, in which Maine men have always taken so much pride, will this year be better than it has been for several years. At the first call Thursday a large number of candidates appeared and some good men are found in the Freshman class. Three fine trombonists have been added in Higgins, Brewer, and Ackley, all of 1913.

The band played at the game Saturday and for so early in the season the music was excellent. By the time of the game with Bowdoin the band will be fully prepared to do its part in stimulating the Maine spirit.

The following men are trying out, most of the upperclassmen being members of last year's band:

CORNETS	Winchester, '11	
Homer, '12	Allen, '13	
McLain, '13	Page, '12	
Burgess, '11		TROMBONES
Cummings, '10	Higgins, '13	
Shales, '12	Brewer, '13	
Graves, '13	Stone, '12	
Swasey, '13	Ackley, '12	
Burke, '10		BARITONE
CLARINETS	Oak, '10

Gleason, '12	Wertheim, '11	
King, '12		BASS DRUM
Chandler,	Corning	
ALTOS		SYMBALS
Smith, '10,	Morrison	

THE FIRST MASS-MEETING.

The first mass-meeting of the year took place Friday morning and it was a "rouser." It was held for no particular purposes only to stimulate the Maine spirit lying in the breasts of the upperclassmen and to give the freshmen a little idea of what that spirit is.

The meeting lasted for three quarters of an hour and included the time usually allotted to chapel. President Johnson of the Athletic Association presided and Earle Berry, '10, led

the cheering which proved that the throats of Maine men were as strong as ever. All of the speakers touched upon football which is so much in prominence just at present.

Mr. Jones, the chairman of the faculty committee on football, was the first speaker and he discussed in very plain language the bald fact that Maine has won so few championships in the last three years. He ascribed it to the disinclination of men to turn out for the teams as shown by the fact that by far fewer men have won their M's during this recent period than previously.

Ray, the star football player and all-Maine tackle, spoke of the Maine spirit and of its origin in class spirit.

Prof. McKee, one of the new members of the faculty, who used to play football at Wooster, talked briefly on the inconveniences which it is necessary for the students to make themselves, such as training, in order to develop victorious teams.

James A. Gannett, '08, the new treasurer of the Athletic Association, outlined the plans for this year. These include an expenditure of \$7000 which it is proposed to raise from the alumni, who have never before been depended upon for very large portion, and from the student body and the gate receipts.

Parker, '12, and captain Cook, of the eleven, each spoke a few words that were eagerly listened to by the audience.

The last one on the program was Coach Schildmiller, who was given a clamorous ovation as he stepped to the platform. In opening he congratulated the Maine fellows on being able to make a man feel at home among them as they had made him feel during his brief sojourn here. He then took the opportunity to say what he expected of the squad, and that was work. He wanted more heavy material, he said, but he wanted no man who was not willing to work and fight. He refused to make any forecast at all of the season but he stated emphatically that whatever the outcome of the previous games he should concentrate all his efforts and all the efforts of the team on the State series.

The mass-meeting closed with the playing of that familiar song, "Our Director." The meet-

ing was h

CLASS ELECTIONS.

Nearly every noon during the past week Alumni Hall has been the scene of class meetings for the election of officers for the coming year. The Freshmen were the first to get together for this purpose and elected the following officers pro tem: William F. Fletcher, Dorchester, Mass., president; Charles E. Ryder, Boston, Mass. vice-president; Miss Alice Harvey, Bangor, secretary, and Harold Hamlin, Orono, treasurer.

The Senior class held their meeting on Tuesday and chose George Springer, Portland, president; Kent R. Fox, Bangor, vice-president; Miss Francis S. Arnold, Orono, secretary; Charles Graham, Brooklyn, N. Y., treasurer.

On Wednesday the Junior class met and elected George A. Wakefield, Andover, president; Frank Southard, Lewiston, vice-president; Miss Annie H. Gilbert Old Orchard, secretary and Winslow Gooch, Wakefield, Mass., treasurer.

Ashton H. Hart, who has left college resigned as manager of the 1911 *Prism* and Raymond W. Davis, of Guilford, was elected to fill the vacancy. Sidney M. Jones, of Bangor, was made assistant manager.

At the sophomore meeting William E. Parker, Harrington, was elected president; William R. Ballou, Bath, vice-president; Miss M. June Kelley, secretary; and Graham B. Spear, Springfield, Mass., treasurer.

Y. M. C. A. RECEPTION.

The annual reception of the Young Men's Christian Association was held in the Chapel Saturday, Sept. 18. A large number of students, both old and new, were brought together and given an opportunity to make each other's acquaintance.

The reception was not different from past years. After a social hour during which the guests were

received by Dean Stevens, Prof. Chrysler, Mrs. Wittig, Miss. Mildred Prentiss, '11, president of the Y. W. C. A., and I. M. Stover, '10, president of the Y. M. C. A., the assembly was called to order and listened to speeches in regard to various branches of university activities.

In the absence of President Fellows, who was ill, Dean Stevens spoke a few words. He took occasion for the benefit especially of the new men to point out the distinction between a prominent college man and a notorious one. The musical organizations were represented by Harold G. Wood, '11; the literary interests by Franklin W. Petty, '10, president of the Literati; baseball by Manager M. F. McCarthy, '11; the Dramatic Club by Malcolm E. Fassett, '10; basketball by Arthur S. Moore, '10, the manager; the Y. W. C. A. by Miss Mildred L. Prentiss; track by Frank E. Fortier, '10, the captain; the Debating Club by F. L. Chenery, '11, and football by the manager, Chester C. Johnson, '10.

Refreshments were served by the young ladies of the Y. W. C. A. The Chapel was simply decorated with autumn leaves and evergreen. James L. Whitmore, '10, I. M. Stover, '10, and Austin L. Maddox, '10, constituted the committee in charge of the affair.

LECTURES ON HISTORY, PHILOSOPHY, AND SOCIOLOGY.

In accordance with the custom which has been followed for the past two years a course of weekly lectures has been provided for the fall semester. Fifteen lectures constitute the course and the subjects include Spanish and South America by Prof. Caroline Colvin, the History of American Philosophy by Professor Craig and Some American Social Problems, by Professor Sprague.

The first talk was given last Wednesday by Prof. Craig on Absolutism. The lectures will be continued each Wednesday at 4.30 o'clock in the Library. Prof. Craig is an interesting lecturer with a dry sense of humor. He said in part:

There is no history of American philosophy as distinct from the philosophy of Europe. Until the present time American could not claim one

philosophic writer of anywhere near the first rank. At the present time, however, a great wave of activity in philosophic thought has swept over the country and Americans are doing their share in the philosophic reconstruction of our day. This philosophic reconstruction is seen in most striking form in the much-talked-of "pragmatism," and it is to the pragmatic idea that this series of five lectures will be chiefly devoted. In order to understand pragmatism, however, we must understand what it is that pragmatism is struggling against and endeavoring to replace, and that is, absolutism. Absolutism is the general state of mind of thinkers in the earliest times, and it persists in the less thoughtful minds and the less thought-out subjects to the present day. Absolutism includes despotism in government, dogmatism in teaching, and conservatism in all departments of life. The next lecture will treat the first attempts to shake off the shackles of absolutism.

The following topics will be discussed in subsequent lectures:

- | | |
|--|-------------------|
| HISTORY OF AMERICAN PHILOSOPHY, | Professor Craig |
| September 22, Absolutism | |
| September 29, Revolutionism | |
| October 6, Evolutionism | |
| October 13, Pragmatism and the Modern Scientific Spirit | |
| October 20, Conclusion: The General Trend of the History of Philosophy | |
| SOME AMERICAN SOCIAL PROBLEMS, | Professor Sprague |
| October 27, Lawlessness and Crime in America | |
| November 3, Divorce | |
| November 10, Celibacy and Race Suicide | |
| November 17, The Status of Women in Ancient and Modern Times | |
| December 1, Puritanism vs. Continentalism in American Life | |
| SPANISH SOUTH AMERICA, | Professor Colvin |
| December 8, The Colonial Period | |
| December 15, Independence and the Monroe Doctrine | |
| January 5, Struggle for the Establishment of Republican Governments | |
| January 12, Social and Industrial Conditions | |
| January 19, Industrial Relations | |

SUMMER TERM.

The Summer Term of 1909 was perhaps the most successful of any yet held, the number of

instructors and courses given was larger, the attendance greater and the atmosphere most agreeable. In addition to Dean Steven and Professor Woodman in Physics, Professor Hart and Mr. Reed in Mathematics, Professor Davidson in Education, Professor Sprague in History and Sociology, Professor Raggio in French and Spanish, Mr. Conser in Botany, and Mr. Drummond in German, the teaching force included Professor Charles Hoeing of the University of Rochester in Latin, Mr. E. L. Raiche of the Browne and Nichols School, who taught here during the Summer Term of 1905 and 1906, in French, Dr. L. L. Burgess of Harvard, who taught here in 1906 and 1908, in Chemistry, Mr. A. B. Kershaw of the Allen School, formerly Instructor at Bates, in English, Professor E. S. Hawes of the Pennsylvania Military College in English and Elocution, and Professor M. T. Scudder of Rutgers in Education.

The registration reached 125, a gain of 26 over last year. Among the students, were 14 who held degrees from the following institutions: Maine, Boston University, Wellesley, Harvard, Van Buren, Bates, Michigan, Bowdoin, Smith, and Garret Biblical Institute. There were in addition 15 students who had completed part of their course in their colleges and universities and 35 who were registered in the University last year. Twenty are candidates for admission this fall, and 54 are superintendents or teachers.

Evening lectures were given by Hon. Payson Smith, State Superintendent of Schools, Professor M. T. Scudder, and Dean J. N. Hart. Mr. and Mrs. Raiche gave a reading of the French play, "L'Evasion," and Prof. Raggio rendered a canto of Dante's Inferno in Italian, French, Spanish, German, and English. The usual vesper services were held on Sunday afternoons.

FACULTY CHANGES.

Owing to the resignations and removals to other colleges of several members of the Faculty of the University, there are quite a number of changes in the departments. The new men are as follows:

Ralph Harper McKee, Ph. D., Professor of Chemistry.
Garrett William Thompson, Ph. D., Professor of Germanic Languages.

Charles William Easley, Ph. D., Associate Professor of Chemistry.

Laura Comstock, Assistant Professor of Domestic Science.

M. E. Sherwin, Assistant Professor of Agronomy.

Bertrand French Brann, B. S., Instructor in Chemistry
Sherman David Chambers, B. S., Instructor in Mathematics.

James R. Dice, V. S., Instructor in Animal Industry.

Robert Rutherford Drummond, B. S., Instructor in Germanic Languages.

Mr. E. T. Drew, Instructor in Physics.

Mr. Cheswell, Instructor in Mechanical and Electrical Engineering.

Prof. J. B. Dice, Assistant in Animal Industry.

Mr. Simmons, Extension Work in Agriculture.

Truman Leigh Hamlin, M. A., Instructor in Mathematics

Benjamin Engle Kraybill, M. S., Instructor in Industrial Chemistry.

Wintha Rudolph Palmer, B. S., Instructor in Horticulture.

George Alvin Scott, B. S., Instructor in Physics.

Walter Edmund Wilbur, B. S., Instructor in Mathematics.

Several promotions have been made:

Guy Andrew Thompson, M. A., from Assistant Professor of English to Professor of English Literature.

Windsor Pratt Daggett, Ph. B., from Assistant Professor to Professor of Public Speaking.

Archer Lewis Grover, B. S., from Instructor to Assistant Professor of Drawing.

Paul Leonard Bean, B. S., from Instructor to Assistant Professor of Civil Engineering.

The resignations include the following prominent and popular men:

Alfred Bellamy Aubert, M. S., Professor of Chemistry.

William Daniel Hurd, M. Agr., Professor of Agronomy.

Walter Stevens Brown, Captain U. S. A., Professor of Military Science and Tactics.

James Earl McClintock, B. S., Assistant Professor of Agronomy.

Ernest David Waid, B. S., Assistant Professor of Agronomy.

Elmer Earl Moost, M. S., Instructor in Mathematics.

Robert Edmund Clayton, B. S., Instructor in Chemistry.

Gladys Ethel Fellows, B. A., Instructor in Romance Languages.

James Seymour, B. S., Ph. C., Instructor in Chemistry.

Henry Lewis Sweet, B. A., Instructor in Mathematics.

Two able and highly respected members of the faculty, Horace Melvin Estabrooke, M. S., M. A. Professor of English, and Joseph William Carr,

Ph. D., Professor of Germanic Languages, died during last year.

The following changes have been made in the Agricultural Experiment Station:

Oskar Augustus Johannsen, Ph. D., Associate Entomologist.

Walter Weidenfeld Bonns, S. B., Associate Horticulturist.

Albert Guy Durgin, M. S., Assistant Chemist.

Harry Morgan Woods, B. A. Assistant to the Director.

RESIGNATIONS.

Joanna Carver Colcord, M. S., Assistant Chemist.

Rex Carleton Gellerson, B. S., Inspector.

Professor McKee graduated at Wooster University in 1895 and during his senior year was assistant in chemistry. He was Professor of Chemistry in Carthage College, 1895-98, and a graduate student at the University of Chicago for three years, during one of which he held a teaching fellowship. He received his Ph. D. in chemistry in 1901; since that time he has taught at Lake Forest College, having been Instructor in Chemistry during 1901-02 and Professor of Chemistry since 1902. Dr. McKee is the discoverer of a process for obtaining soluble potassium compounds which renders it unnecessary to import them from Germany.

Professor Gray is a graduate of Columbia in the class of 1893. While an undergraduate he carried graduate courses in Comparative Literature under Professor George E. Woodbury and American Literature under Professor Brander Mathews. He won a first prize in oratory and at graduation was class orator. He has carried on graduate work at Harvard, Yale, and Oxford, and conducted special investigations in the British Museums. He has been in demand as a lecturer, and among the lectures which he has been called upon to give most frequently are those on Shakespeare, Browning, and the Evangeline country.

Professor Garrett W. Thompson is a graduate of Amherst College in 1888, was for two years a student at the University of Berlin, and received his Ph. D. at the University of Pennsylvania in 1908 for work in Germanics. Professor Thompson is the author of a novel called "Threads," has published some charming verse, and is a talented musician.

Professor Easley graduated at Dickinson College in 1897 and received the degree of Ph. D. at Clark University in 1908, for work in Chemistry and Physics. He taught science at the Troy Conference Seminary, 1897-99, and Dover Academy, 1899-1901. He was awarded a scholarship at Clark University in 1901 and a fellowship in 1902, and held an honorary fellowship, 1903-08. He has designed improved apparatus which gives increased accuracy in analytical work.

Professor Comstock is a graduate of the Buffalo, N. Y., State Normal School and taught successfully for some years in the normal schools at Oswego, N. Y., and Stevens Point, Wisconsin. In order to prepare herself properly to teach domestic science Miss Comstock has studied at Pratt Institute and is a graduate of that institution. It will interest many people in the State of Maine to know that among those who recommended Miss Comstock highly was Miss Mary B. Snow, formerly Superintendent of Schools in Bangor, late Supervisor of Practice Teaching at Pratt Institute, and recently elected to a position in Chicago in which she has charge of all work in Domestic Science in the Chicago public schools.

Mr. Drummond graduated at the University of Maine in the class of 1905, with a major in German, and entered the University of Pennsylvania for graduate work. He was University Scholar in Germanics, 1905-07, and Harrison Fellow in Germanics, 1907-09. He will receive his Ph. D. in December.

Mr. Hamlin is a graduate of Western Reserve University in the class of 1899. During the summer of 1909 he has been a student at Teachers' College, Columbia University.

Mr. Kraybill, after graduation at the Millersville (Pennsylvania) State Normal School, taught successfully for four years in the public schools of Pennsylvania.

Mr. Scott graduated in Electrical Engineering from the University of Wisconsin in 1902, and during the following year, as well as for the Summer Session of 1903, he was Instructor in Electrical Engineering there. After six years practical experience he has decided to return to teaching.

Mr. Chambers is a graduate of Baldwin Uni-

versity in 1904. After teaching mathematics for a year in the Eaton, (Ohio) High School, and two years in the Wyoming Seminary at Kingston, Pa., he held a fellowship in mathematics at the Ohio State University for 1907-08.

Mr. Dice is a graduate of the Michigan Agricultural College in the class of 1908, and while a student won the Michigan sweepstakes in stock judging. During the last year he has been having practical experience in farm management.

Mr. Palmer is a graduate of the Oregon Agricultural College in the class of 1909, and has had a valuable and varied experience in the great fruit regions of the northwest.

Mr. Wilbur is a Maine, 1908, man. During the last year he has taught in the Orono High School and carried on graduate work in Mathematics at the University.

Doctor Johannsen is an entomologist of international reputation with years of experience in investigation and publication. He is a Dane by birth, and in addition to Danish is familiar with Swedish, German, Italian, French, Spanish and English. He graduated at the University of Illinois in 1893 and received the degree of Ph. D. in Entomology at Cornell in 1904. He is the editor of one volume of *Insecta Genorum*, is one of the revisors of Williston's *Diptera* and author of a part of it, has done research work for Doctor Howard on the malarial mosquito, and has had a series of his productions published by the New York State Museum. He is a member of Sigma Xi.

Mr. Bonns graduated from the Massachusetts Institute of Technology, in 1899, in architecture. After several years in that profession he found that the confinement was undermining his health, and therefore he has fitted himself for work in horticulture. He has done special work in the New York State Agricultural Experiment Station at Geneva, and has spent a year in horticultural investigations in the Ozark region. Mr. Bonns has carried on important investigations upon the effect of cold upon vegetable cells, a matter of vital importance to Maine horticulturists.

Mr. Durgin graduated at Maine in the course in Chemistry in 1908, and in addition to acting as Assistant in Chemistry during the last year

carried graduate work in chemistry and received the degree of M. S. in June.

Mr. Woods is a graduate of the University in the class of 1909.

The retirement of Professor Aubert, after continuous service for the University since February, 1874, removes a man who has held a warm place in the affections of those who have been privileged to know him during this period. More anecdotes center about him than all other members of the faculty together; they are all of the sort that show marked individuality, never weakness or unpopularity. Professor Aubert has retired owing to ill health. He has for years done microscopic work of importance, and is now planning to devote himself to further work along this line.

Dean Hurd retires to accept the position of Director of Extension Work at the Massachusetts Agricultural College whose President has been endeavoring to secure his services for the last three years. The Commencement before he came to the University no student had graduated in Agriculture, and during the next two years there was only one in each year. The last catalog shows 150 students in the College of Agriculture, of whom 80 were in regular four years courses. In addition to this, several hundred were carrying on regular correspondence courses and nearly six hundred were in attendance during the last Farmers' Week.

Captain Brown has retired after four years service. It had been hoped that arrangements might be made to have him continue here, but physical disability compelled his retirement from active service and made further work here impossible. In addition to his duties as military instructor, Captain Brown has taken an active interest in all University affairs, and his services as Treasurer of the Athletic Association for more than two years have been of great benefit to that organization.

Professor McClintock has resigned in order to accept a position in the Department of Agriculture at Washington; Professor Waid goes to the Ohio State University (his Alma Mater), and Mr. Moots to the University of Wisconsin. Miss Fellows has become Mrs. Gustav F. Wittig. Mr. Clayton and Mr. Seymour are leaving teaching for business; and Mr. Sweet resigned in order to become principal of the Orono High School.

Assistant Professor Willard has two years leave of absence, which he will spend in graduate work at Yale.

—♦♦—
'09.

G. T. Carlisle is at Jackson, where he is engaged in forest survey work of burnt land in connection with a lawsuit against the Canadian Pacific Ry.

Robley H. Morrison will take a position as chemist in a pulp mill at Rumford Falls on October 1st.

town laundry.

Third:—We guarantee as good
work as any laundry, in the State.
Our machinery is the most im-
proved.

Fourth:—Our prices are as low as
you can find elsewhere.

Fifth:—We do all kinds of laun-
dry work.—Repairing, cleansing
and pressing suits.

Sixth:—Our team calls at the col-
leges four time a week, Mondays,
Wednesdays, Thursdays and Satur-
days. In fact we are at your dis-
posal any time. If you want us
call up phone 31-12 and test our
willingness to serve you.

One college man after
another has learned that

FATIMA

TURKISH
CIGARETTES

are just the kind he likes, and
has told his friends about them.
Thus their popularity grew un-
til today "Fatimas" are very
popular among college men
everywhere.
